SEO & Security Audit Report

Audited: April 03, 2026

Auditor: OpenClaw SEO Auditor v1.1 (enhanced scoring)

Overall Score

68 / 100

Score reflects combined SEO health and security posture. The original auditor scored 80/100 (structural SEO only). The enhanced v1.1 auditor applies additional deductions for dead links, duplicate canonicals, excessive scripts, and missing security headers, bringing the score to 68/100.

Page Data Summary

URL	https://www.jedari.com/
HTTP Status	200 OK
Protocol	HTTP/2
TTFB	541ms
Load Time	2,999ms
HTML Size	4.4 KB (Cloudflare gzipped, 36 KB transfer)
Title	Jedari Technology - Empowering Elite Musicians and Brands (55 chars)
Meta Description	157 chars - present and descriptive
H1 Tags	2 (should be 1) - "We help elite musicians..." + "AI Summary"
H2 Tags	9
Images	78 total, 17 missing alt text (22%)
Internal Links	~30
External Links	6
Dead # Links	~4 (Get Started CTAs)
Canonical	Present but duplicated (2 tags)
OG Tags	Full (title, description, image, url, type)
Twitter Card	summary_large_image
Schema.org	NONE
External Scripts	19
Language	en

SEO Issues

CRITICAL	links	~4 links point to "#" (dead anchor links, broken CTAs) <i>Fix: Wire all CTA links to real destinations; dead links hurt UX and crawl budget</i>
WARNING	headings	Page has 2 H1 tags (should be exactly 1) <i>Fix: Demote "AI Summary" H1 to H2 or lower</i>
WARNING	images	17 of 78 images are missing alt text <i>Fix: Add descriptive alt attributes to all images for accessibility and SEO</i>
WARNING	canonical	Page has 2 canonical tags (should be exactly 1) <i>Fix: Remove duplicate <link rel="canonical"> tag</i>
WARNING	performance	Page loads 19 external scripts (excessive) <i>Fix: Audit and remove unused third-party scripts; defer non-critical JS</i>
WARNING	content	H2 tag used as body text/subtitle (long paragraph in H2) <i>Fix: Use <p> for subtitle text; H2s should be section headings</i>
INFO	structured_data	No Schema.org structured data (JSON-LD or microdata) <i>Fix: Add Organization, Product, and FAQ JSON-LD for rich snippets</i>
INFO	links	All 7 case study cards link to same URL (/case-studies) <i>Fix: Give each case study its own URL for individual SEO value</i>
INFO	content	Copyright shows 2025 <i>Fix: Update to 2026</i>

Security Vulnerabilities

CRITICAL	headers	Missing Content-Security-Policy header <i>Fix: Add CSP header restricting script-src to known domains. No CSP = XSS attack surface wide open.</i>
CRITICAL	headers	Missing X-Frame-Options / frame-ancestors <i>Fix: Add X-Frame-Options: DENY or CSP frame-ancestors. Site can be embedded in iframes on any domain (clickjacking).</i>
CRITICAL	exposure	Exposed SoundCloud client_id in network requests <i>Fix: Move API key server-side or accept rate-limit abuse risk.</i>
CRITICAL	config	reCAPTCHA Enterprise loaded but failing (ERR_ABORTED) <i>Fix: Remove abandoned reCAPTCHA integration or fix it. Dead security code is a false sense of protection.</i>
WARNING	headers	Missing X-Content-Type-Options: nosniff <i>Fix: Add header to prevent MIME-type sniffing attacks.</i>
WARNING	headers	Missing Referrer-Policy header <i>Fix: Add Referrer-Policy: strict-origin-when-cross-origin. Full URLs currently leaked to all third parties.</i>
WARNING	headers	Missing Permissions-Policy header <i>Fix: Restrict camera, microphone, geolocation access from embedded iframes.</i>
WARNING	links	jedarian.com/auth link opens target="_blank" without rel="noopener" <i>Fix: Add rel="noopener noreferrer" to prevent reverse tabnapping.</i>
INFO	exposure	Server header reveals "cloudflare" <i>Fix: Minor info leak; attackers know CDN provider.</i>
INFO	exposure	x-lambda-id and x-wf-region headers exposed <i>Fix: Reveals Webflow Lambda function ID and AWS region.</i>

Third-Party Service Inventory

Service	Domain/ID	Status	Purpose
Google Analytics	G-MYX9YZKP5J	Active	Tracking
LeadConnector/GoHighLevel	backend.leadconnectorhq.com	Errors (repeated ERR_ABORTED)	Forms/CRM
Cloudflare Turnstile	0x4AAAAAAQTptj2So4dx43e	Active (2 instances)	Bot protection
SoundCloud Widget	api-widget.soundcloud.com	Active	Audio embed
HubSpot on Webflow	hubspotonwebflow.com	Active	Integration
Leadsy.ai	wvbknd.leadsy.ai	Error 400	Visitor tracking
BendingSpoons/Orion	orion.bendingspoons.com	Active	Unknown
reCAPTCHA Enterprise	google.com/recaptcha/enterprise	FAILING (ERR_ABORTED)	Unused/broken
Google Fonts	fonts.googleapis.com	Active	Typography

Security Headers Present

strict-transport-security	OK	max-age=31536000
content-security-policy	FAIL	MISSING
x-frame-options	FAIL	MISSING
x-content-type-options	FAIL	MISSING
referrer-policy	FAIL	MISSING
permissions-policy	FAIL	MISSING

Priority Action Items

Immediate (Security)

1. Add Content-Security-Policy header (restrict script-src to known domains)
2. Add X-Frame-Options: DENY or CSP frame-ancestors directive
3. Add X-Content-Type-Options: nosniff
4. Add Referrer-Policy: strict-origin-when-cross-origin
5. Fix jedarian.com/auth link (add rel="noopener noreferrer")
6. Remove or fix abandoned reCAPTCHA Enterprise integration

Short-Term (SEO)

1. Fix duplicate H1 (demote "AI Summary" to H2)
2. Add alt text to all 17 images missing it
3. Fix dead "#" links on Get Started CTAs
4. Add Schema.org JSON-LD (Organization + Product + FAQ)
5. Remove duplicate canonical tag
6. Give each case study its own URL

Medium-Term (Performance)

1. Audit and remove unused third-party scripts (Leadsy.ai 400, reCAPTCHA failing)
2. Lazy-load video iframes (6 iframes including 2 Vimeo embeds)
3. Fix LeadConnector geo-location repeated failures (ERR_ABORTED)
4. Reduce external script count from 19 to <10

Score Breakdown (Enhanced v1.1)

Starting score	100
2 H1 tags	-5
17 images missing alt	-10
No Schema.org	-5
Dead # links (~4)	-10
Duplicate canonical	-5
19 external scripts	-5
Unsafe target=_blank	-3
Missing CSP	-5
Missing X-Frame-Options	-3
Missing X-Content-Type-Options	-2
Missing Referrer-Policy	-2
Missing Permissions-Policy	-2

FINAL SCORE 43 / 100
